

Startup Evaluation Report

Generated on: January 06, 2026

Feasibility Score

10/100

Executive Summary

The startup idea proposes a universal AI assistant that predicts personal life events, economic changes, and global political outcomes years in advance with guaranteed advice, but this is scientifically impossible and lacks a clear execution plan.

Problem Statement

The idea attempts to solve the problem of uncertainty in personal and global events, but this is an impossible task.

Target Users

The target users are unclear, but presumably anyone seeking guidance on life events, economic changes, and global politics.

Market Potential

The market potential is unclear, but the idea may appeal to individuals seeking guidance on uncertain events.

Technical Feasibility

This idea is scientifically impossible due to the inability to predict the future with certainty. Current AI technology can provide insights, but not predictions. The use of 'AI' is a buzzword misapplied to an impossible task.

Innovation & Uniqueness

The idea is not innovative, as it claims to achieve the impossible.

Risks & Challenges

The main risks and challenges are the scientific impossibility of the idea and the lack of a clear execution plan.

Strengths

- Potential appeal to individuals seeking guidance

Weaknesses

- Scientifically impossible
- Lack of clear execution plan
- Unclear target users

Improvement Suggestions

- Focus on providing insights rather than predictions
- Develop a clear execution plan
- Identify a specific target user segment

Final Recommendation

This idea is not feasible due to its scientific impossibility and lack of a clear execution plan.
